

### TWECO® Style Head Lincoln® Style Termination

**M250 TL** is a newly designed, heavy-duty, durable, light weight MIG gun, equipped with a push-on nozzle as well as a comfortable ergonomic handle and Tweco® style torch head with Lincoln® style termination.

This MIG gun possesses a unique capability of converting its termination style to other common styles such as Miller® style, Tweco® style, or Euro style by simply replacing the installed Lincoln® style termination kit with the desired one.

## FEATURES

- Knuckle joint for improved balance and position-ability ensures that minor movements of the handle and neck be independent of the cable assembly .
- Excellent heat, abrasion resistance, and flexibility of the cable .
- Lighter than standard cable sets and capable to withstand over 1 million flexes in life testing .
- Extremely durable contact tips manufactured from premium grade copper alloys .
- Standard, durable, and high-performance options for tip adaptors, diffusers, and swan necks .
- Improved insulation and minimized heat transfer to the handle .
- Ergo design handle and comfortable handling .
- Light gun handle, less tiredness of the welder because of the special gun design .

**Rating : 230A CO<sub>2</sub> 200A mixed gas**

**@ 60% duty cycle.**

(as Standard IEC EN60974-7)

#### Recommended For :

**Solid wires: 0.030 to 0.045 in. (0.8 to 1.2 mm)**

**Flux cored wires: 0.030 to 0.045 (0.8 to 1.2 mm)**

**Aluminum wires: 0.040 to 0.045 in. (1.0 to 1.2 mm)**

**Gun Length : 10ft. (3m)**

#### Recommended Gas Flow :

**22-27 CHF (11-13 l/min)**

**for 1/2 inch (12.8 mm) nozzle bore**

**30-35 CHF (14-17 l/min)**

**for 5/8 inch (16.0 mm) nozzle bore**

**30-40 CHF (14-19 l/min)**

**for 3/4 inch (19.0 mm) nozzle bore**

**Lincoln® Style Termination**

- Air gap technology for cooler running handles and better heat transfer isolator from the swan neck .
- Steel and combo liner for all kinds of wires such as steel (metalcore and flux-cored), stainless steel (metalcore and flux-cored), and Aluminum .
- Unique sealing ring for effective sealing of impurities especially in the argon gas process .
- Reduction in welder fatigue by improved handle design for welder's comfort .
- Push on nozzle system and easy nozzle stick-out adjustment .
- High-quality trigger with a life expectancy of greater than 1 million cycles .
